

SAHAYA ARULANANDA GEETHAN S

DevOps Engineer with 2+ years of experience in automation and system optimization within cloud environments. Skilled in managing Linux-based systems, CI/CD pipelines, cloud infrastructure provisioning and management using Terraform, containerization technologies, including Docker and Kubernetes, and monitoring and logging solutions. Seeking to transition into new field, leveraging these transferable skills to drive innovation and operational efficiency.

PROFESSIONAL EXPERIENCE

GOBUBBLE

Jun 2024 - Oct 2024

Cloud DevOps Engineer

Developed a comprehensive DevOps framework to enhance our cloud infrastructure. The key tasks included automating deployment processes, managing **AWS and GCP** resources with Infrastructure as Code (IaC), and orchestrating **Kubernetes** for application scalability.

- Created CI/CD pipelines with **GitHub Actions and Google Cloud Build**; leveraged Terraform for IaC to provision resources across AWS and GCP, improving deployment efficiency by 75%.
- Transferred infrastructure from GCP to AWS using Terraform (IaC) and integrated CI/CD pipelines, **enhancing deployment productivity by 70%**. Orchestrated **Kubernetes** deployments with **Helm and ArgoCD**, and implemented CRDs for secret management, improving scalability and security.
- Designed comprehensive monitoring and logging frameworks by integrating **Prometheus, Grafana, CloudWatch, and Loki**, improving incident response times by 60% while providing real-time system insights.

CLARIUM AVD

Cloud DevOps Engineer

Jan 2024 -May 2024

Implemented Azure Virtual Desktop (AVD) to replace traditional Azure VMs, automating shutdowns due to inactivity, **resulting in a significant cost reduction**. Built CI/CD pipelines with Terraform for infrastructure management, enhancing deployment efficiency and reducing manual errors. Employed reserved instances for further cost savings while optimizing network security through private networks and firewalls.

- Engineered **CI/CD pipelines** for infrastructure management using **Terraform**, resulting in a 60% increase in deployment frequency and a significant reduction in manual errors during environment setups.
- Implemented Azure Virtual Desktop (AVD) role management, user assignments, and PowerShell scripts, optimizing VM availability and **saving 80% in operational costs**.
- Enhanced network security by configuring private networks and firewalls, ensuring secure communication and reducing exposure to external threats.

BENEFITMALL

Cloud DevOps Engineer

May 2023 -Dec 2023

Migrated to Azure Cloud using Infrastructure as Code (IaC) combined with CI/CD pipelines to provision infrastructure without errors. Constructed CI/CD pipelines for deploying .NET application projects across Azure Cloud Services, enabling deployment to multiple environments in a single pipeline run. Maintained pipeline templates for flexible usage in build, test, publish, and deployment processes.

- Devised CI/CD pipelines using **Azure DevOps, Git, and Docker**; transitioned classic pipelines to YAML templates and incorporated Veracode scans, **reducing vulnerabilities by 60%**.
- Moved on-premises applications to Azure Cloud using Terraform to provision VMs, Networks, Storage, and Key Vault, achieving a 60% improvement in deployment time.
- **Containerized applications**, transitioned to microservices, and utilized Terraform for IaC, enhancing scalability and reducing downtime by 80%.

SKILLS

- CI/CD Pipelines, Cloud Computing, Infrastructure as Code (IaC), Linux, Scripting, Docker, Kubernetes, Helm, ArgoCD, Monitoring Tools, MySQL, SQL, Postgres, Python.

EDUCATION

LOYOLA ICAM COLLEGE OF ENGINEERING AND TECHNOLOGY

Bachelor of Engineering

2018 - 2022
